

tuuber_Settings
+ backgroundImageName : String + baseURL : String + sessionID : String + plID : String + lastLogin : String // Access using mySettingsVariableName.thisUser.first etc + thisUser : aPerson
// will read from disk the last settings, or apply defaults + get (): tuuber_Settings // will save to disk the class properties + set (mySettingsVariableName tuuber_Settings): void// will populate returned record with defa + new (screenName ComponentContainer) : tuuber_Settings

Suggested class to store values required
between runs and/or screens

```
// Sample usage
// Declare:
tuuber_Settings applicationSettings;
// Instantiate:
applicationSettings = new tuuber_Settings(this);
// Usage syntax:
applicationSettings.get()
System.err.println (applicationSettings.thisUser.first);
screen09_Settings.Image(applicationSettings.backgroundImageName);
```
